

Csaba Darazs

Profile

I am a hardworking and enthusiastic computer science graduate. I enjoy working with and learning new technologies and continuously improving my skills. I'm a goal driven person and I enjoy working in teams and am also confident as an individual contributor.

Projects

QA Tester

OCTOBER 2020 — DECEMBER 2020

I am currently working as QA Tester for a startup company located in the UK. The role requires me to write up a Test Plan with my team for each sprint. During the sprint we track what changes are being made and test them to assure that the new features match the user story, work as intended without any bugs and are easy to use. After each sprint a full test is performed and a full report of any bugs and issues is created.

Website development

I am currently in the process of redesigning a website for a small business. The project involves updating WordPress and resolving any issues that might come from it, managing the server side of the site and updating context and visuals of the website using PHP, CSS and HTML.

Application development

Part of University assignment project I developed a hospital management application using C# and SQL to help allocate and locate patients, ambulances and first responders. The project involved the development of a database, the designing of a back-end system and a user interface.

SalesForce

As a personal project I have created a personal management system using Salesforce, which creates reports for me. I have created a mobile interface for the system as well, as that made it easier to add records to it on the go.

Courses

Responsive Web Design, FreeCodeCamp

JULY 2020 — JULY 2020

JavaScript Algorithms and Data Structures, FreeCodeCamp

JUNE 2020 — JULY 2020

Salesforce Platform App Builder, Trailhead

JANUARY 2020 — JUNE 2020

Front End Libraries, FreeCodeCamp

NOVEMBER 2020 — NOVEMBER 2020

Education

Computer Science, University of Auckland, Auckland

MARCH 2015 – NOVEMBER 2019

Employment History

Senior Team Member, Extreme Edge, Auckland

MAY 2016 – PRESENT

My core responsibilities is to teach the safe usage of the climbing gym, to help and teach the new staff members in learning the necessary skills they will need and ensuring a high level of customer experience.

I am also responsible for managing our IT environments. This includes management of the business application database(MS SQL), POS, network and security system. One of my recent main tasks is to redesign the Extreme Edge website and to ensure the smooth transition onto the new website.
